424

10. Prospects of the season are reported to be generally good and no special relief measures were necessary in this District, in view of there being no distress in this District. There was an average rainfall of 5·94" in this District, from the beginning of the calendar year 1952.

11. The Public Health was generally good, except in Galihally village of Tarikere Taluk, where it is reported that Cholera epidemic disease has broken out and there were 2 deaths from that disease. The District Health Officer, has been requested to take necessary preventive measures in the matter.

Cattle are generally healthy.

Water and fodder are available.

CHITALDRUG.

8. Well supplied.

9. *(a) Sowing.*—Groundnut in Jagalur Taluk,

(b) Standing crops.—The condition of the standing crops such as Gidda ragi, Vyasakhi paddy crops under irrigation wells, tanks and nalas in Challakere Taluk; sugarcane, groundnut and paddy in Hiriyur Taluk; onions, tobacco and paddy in Molakalmuru Taluk, paddy in Jagalur and Hosadurga Taluks are reported to be fair due to the recent rains.

(c) Harvesting.—Paddy in Challakere Taluk; sugarcane and groundnut in Hiriyur Taluk, and paddy in Jagalur Taluk are being harvested.

10. Relief works are in progress in the Taluks of Chitaldrug, Hiriyur, Molakalmuru, and Hosadurga Taluks. Cooly classes are finding sufficient labour all over the District except in a few villages, where relief works are under execution for providing employment. The relief works in Challakere and Jagalur Taluks are at standstill as there has been no response from local labourers. The stock position of food grains is satisfactory all over the district and no scarcity has been felt at present.

11. The cattle are reported to be generally healthy all over the District except for prevalence of Rinderpest in a few villages in Challakere, Hiriyur and Hosadurga Taluks. Action is being taken by the authorities of the Veterinary Departments to check its spread. The Notification declaring "Thippareddihally" Village, Challakere Taluk and area comprised within a radius of five miles from the above village as infected area has been issued with effect from 22nd May 1952 for one month.

Public health is good all over the District except for prevalance of small-pox in a few villages in Challakere Taluk. The authorities of the Health Department are taking necessary effective measures to check its spread.

Water is available all over the District.

Fodder scarcity in few villages of Molakalmuru and Hosadurga Taluks has been relieved for the present due to receipt of hay from Mandya District and availability of karada grass in nearby forests.

OFFICE OF THE REVENUE COMMISSIONER IN MYSORE,
Bangalore,
Dated 27th May 1952.

K. SRINIVASAN,
Revenue Commissioner.

OFFICE OF THE DIRECTOR OF ANIMAL HUSBANDRY SERVICES IN MYSORE, BANGALORE.

Notification dated 19th May 1952.

(HEALTH OF LIVE-STOCK DURING APRIL 1952.)

In their order of severity, outbreaks of Rinderpest, Blackquarter, Anthrax, Foot and Mouth, Sheep-pox, Hæmorrhagic-septicæmia, Contagious Goat Pleuro-Pneumonia, Ranikhet and Gastro-entritis were encountered in the State during April 1952. Altogether 233 villages were reported to have been affected by one or the other of the several contagious and infectious diseases as against 214 villages during the previous month. The number of outbreaks was highest in Shimoga, Bangalore and Chitaldrug Districts, while Hassan, Mandya and Chikmagalur Districts were least affected. These diseases accounted for 1,798 attacks, of which 847 succumbed. The departmental staff conducted 66,309 preventive inoculations and vaccinations against all the above diseases except Foot and Mouth disease. In the absence of a reliable method of vaccinatory intervention, other prophylactic measures were adopted against Foot and Mouth diseases.

Twelve outbreaks of Rinderpest were registered in Bangalore North, Devanahalli, Goribidnur, Channagiri, Challakere and Sira Taluks accounting for 250 attacks among cattle, of which 133 succumbed. Prompt measures of control were undertaken by the Department to check its spread and 17,369 cattle in the infected villages and 22,359 cattle in 77 neighbouring villages were protected against this disease. The disease appears to be well under control at the end of the month under report.

Diseases caused by internal parasites were reported from 113 villages accounting for 5 deaths, as against 117 villages accounting for 20 deaths during the previous month. The special staff attached to the parasitic disease control units of the Department dosed 8,422 animals during the previous month.

The rest of the live-stock remained free from diseases during the month, and fodder and water were generally available throughout the State.

844 P. M. NARAYANASWAMI NAIDU, *Director.*
